

Here are **key features to include** in the **GovConUnited** mobile app to make it a powerful, all-in-one platform for government contracting professionals:

Core Networking Features

- **Verified Profiles** – Authentication system for contractors, consultants, and agency reps
 - **Smart Matching** – Connect with potential teaming partners based on NAICS codes, certifications, or past performance
 - **Private Messaging** – Direct, secure communication between users
 - **User Directory** – Searchable list of verified users with filters (agency, set-asides, past awards, etc.)
-

Business Development Tools

- **Opportunity Feed** – Real-time updates from SAM.gov, GSA eBuy, or agency procurement boards
 - **Past Performance Showcases** – Upload capabilities for case studies, award history, and contract wins
 - **Proposal Collaboration Spaces** – Invite partners to co-develop responses to RFPs or RFQs
 - **Saved Opportunities & Alerts** – Bookmark contracts and get notified of similar bids
-

Community & Knowledge Sharing

- **Discussion Forums** – Topic-specific groups for 8(a), SDVOSB, HUBZone, construction, IT, etc.
- **Compliance Corner** – Educational resources on FAR, cybersecurity, contract types, and certifications
- **Event Calendar** – Upcoming industry days, agency outreach events, and trade shows
- **Live Q&A / AMA Sessions** – Chat with contracting officers or subject matter experts

Agency & Vendor Tools

- **Agency Profiles** – Overviews of procurement trends, contact info, forecast links, and spending data
- **Capabilities Brief Builder** – Upload or generate 1-pagers for outreach
- **Set-Aside Tags & Filters** – Search by socio-economic status, set-aside type, or industry code
- **Integration Support** – Optional sync with CRM, SAM.gov registrations, or third-party bid software

Security & Compliance

- **Secure File Sharing** – Share NDAs, teaming agreements, or draft proposals securely
 - **Audit Log for Communications** – Record of messaging activity for compliance-sensitive interactions
 - **Two-Factor Authentication** – Ensures data integrity and user authenticity
-
